Six Tee Nine

Sometimes you got it and sometimes you don't. And mostly we don't have any idea what time it is. Out of nowhere a great round is dashed by a mystery missile into the woods. Where did that come from?

Today you don't have to worry about those lightning bolts. We're only going to count your best six holes on the front and your best six on the back. The other six - well, you can have a par there.

In plain words - figure out your net on each hole - replace three scores with par on the front - do the same with three on the back.

We played this once before, in May and Valenti took the cash. That should be motivation enough for you this time.

Payout to 1st & 2nd places.
